

Control Engineering Middle East

www.controlengme.com

The Middle East represents an important and strategic region for all major vendors in the process automation industry. With some of the highest economic growth in the world, the region continues to be driven by buoyant capital spending and large infrastructure projects with growing opportunities outside the traditional oil and gas and refining industries. While it continues to enjoy an oil boom, capital investment is now being made in a broad spectrum of new manufacturing projects, taking its energy profits from higher oil prices and using them to develop other areas of the economy.

and trends for personal and plant-wide productivity. In its approach to readers in the Middle East the website intends to focus on the design, implementation, maintenance, and management of control and instrumentation systems especially in the process industries, such as hydrocarbon processing, chemical, petrochemical, utilities, and the food and beverage sectors of the market. Control Engineering Middle East, will present the latest technical articles, case studies, Middle East news, product information, tutorials, and technology updates.

Control Engineering Middle East brings together the resources of the Control Engineering editorial staff, which has been published for over 50 years, to provide information on control technology, products, news,

Covering the major Middle East countries:

United Arab Emirates, Saudi Arabia, Qatar, Oman, Kuwait, Israel, Iran, Bahrain & Libya
